

ANWESH KUMAR S V

Machine Learning Engineer | Data Scientist | AI/ML Systems

Bengaluru, India | +91 89700 32228 | anweshkumarsv@gmail.com | linkedin.com/in/anwesh-kumar-sv | anweshsv.netlify.app | github.com/anweshkumarsv

SUMMARY

Machine Learning Engineer with 3+ years of applied project experience across deep learning, predictive modeling, and analytics. Shipped 3 end-to-end systems — a healthcare data-imputation model (40,000+ ICU records), a retail analytics pipeline (1,000+ customers, Power BI), and a deployed price-prediction API ($R^2 = 0.86$). Published and presented an IEEE conference paper on healthcare time-series imputation. B.E. Computer Science graduate, DSCE Bengaluru, 9.15 CGPA.

TECHNICAL SKILLS

- Languages: Python, SQL, C, HTML, CSS, Java
- ML / Deep Learning: Scikit-Learn, PyTorch, TensorFlow, BRITS, SAITS, GAIN, GAN, RNN
- Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel
- Databases: PostgreSQL, SQL
- Tools: Git, GitHub, Jupyter Notebook, VS Code, Flask, Vercel

EXPERIENCE

Freelance Web Developer & AI Integrator — Self-Employed, Bengaluru

Nov 2025 – Apr 2026

(part-time, concurrent with final year of B.E.)

- Delivered 2 production websites (advanterra.in, dhanvithfincare.com) for construction and financial-advisory clients, each shipped in 2–3 weeks from brief to live deployment on Vercel with custom domains.
- Cut development iteration time using AI-assisted coding tools, enabling on-time delivery for both clients within compressed 2–3 week timelines.

PROJECTS

MedImputeX — Medical Time-Series Data Imputation

Aug 2025 – Apr 2026

Stack: Python, PyTorch, TensorFlow, Pandas, NumPy, Scikit-Learn, MIMIC-IV • 1st Prize — Best Capstone Project of Social Relevance, DSCE 2026 (selected from full 8th-semester cohort)

- Reduced ICU time-series imputation error by ~12% MAE and ~9% RMSE by designing a fusion network that combines BRITS (bidirectional RNN), SAITS (self-attention), and GAIN (GAN-based) models trained on 40,000+ MIMIC-IV patient sequences.
- Enabled more reliable downstream clinical ML predictions by reducing missing-data bias in ICU records, directly applicable to hospital decision-support systems.

Customer Shopping Behavior Analysis

Jan 2026 – Apr 2026

Stack: Python, Pandas, PostgreSQL, SQL, Power BI

- Delivered retail strategy insights for 1,000+ customers by cleaning and standardizing transaction data across 15 columns, resolving duplicates and inconsistencies.
- Surfaced revenue, SKU, and retention trends by writing 10 PostgreSQL queries covering monthly revenue, top-selling SKUs, loyalty-tier distribution, and 6-month retention rates.
- Built 6 interactive Power BI dashboards (subscription status, shipping modes, category spend, regional heatmaps) used directly for strategy decisions.

Real Estate Price Prediction

Sep 2023 – Feb 2024

Stack: Python, Pandas, Scikit-Learn, Flask, HTML/CSS/JS

- Achieved $R^2 = 0.86$ predicting Bengaluru housing prices by training a Linear Regression model on 13,200 listings, applying outlier removal and feature selection to improve accuracy.
- Deployed the model as a live Flask REST API delivering price estimates in under 1 second from area, BHK, bathroom count, and location inputs.

PUBLICATIONS

MedImputeX: A Hybrid Generative and Explainable Framework for Missing Data Imputation in Healthcare Time-Series

Aug 2026

IEEE — Second International Conference on Modern Sustainable Systems (CMSS 2026), Universiti Teknologi MARA, Malaysia, in association with RVS College of Engineering and Technology, India

- Co-authored and presented a peer-reviewed paper introducing MedImputeX, a hybrid BRITS + SAITS + GAIN framework with SHAP-based explainability for imputing missing values in ICU time-series data from the MIMIC-IV dataset.
- Delivered a conference presentation on the proposed fusion architecture and its RMSE, MAE, and R² improvements over baseline imputation methods; received a Certificate of Presentation from IEEE / CMSS 2026.

EDUCATION

B.E. — Dayananda Sagar College of Engineering, Bengaluru 2022 – 2026

CGPA: 9.15 / 10.0 • Specialization: Computer Science & Engineering

Pre-University (PCMB), Expert PU College, Mangalore 2020 – 2022

94%

SSLC, Sri Ramakrishna Vivekananda Residential School, Sagar 2020

96%

CERTIFICATIONS

- Data Analytics Certification — Visvesvaraya Technological University (2026)
- Python Essentials and Libraries for Data Science — Visvesvaraya Technological University (2026)
- Complete Data Science, ML, Deep Learning & NLP Bootcamp, 120+ hours — Udemy (2025)
