SUMMARY

- B.E. CSE graduate (DSCE Bengaluru, 9.0 CGPA, top 5%) with 3 years of project experience in ML, deep learning, and data analytics.
- Shipped 3 end-to-end projects: a healthcare imputation system (MIMIC-IV, 40,000+ records), a customer analytics pipeline(1,000+ customers, Power BI) and a real estate price predictor (Flask, $R^2=0.86$).
- Won 1st Prize for Best Social-Relevance Capstone at DSCE 2026; seeking an ML Engineer or Data Scientist role starting mid-2026.

TECHNICAL SKILLS

Languages: Python, SQL, C, HTML, CSS

ML / DL: Scikit-Learn, PyTorch, TensorFlow, BRITS, SAITS, GAIN, GAN, RNN

Data: Pandas, NumPy, Matplotlib, Seaborn, Excel

Visualization: Power BI, Tableau

Databases: PostgreSQL, SQL

Concepts: Supervised/Unsupervised Learning, Deep Learning, Data Imputation, EHR Analytics, NLP

Tools: Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

Freelance Web Developer & AI Integrator | Self-employed | Bengaluru | Nov 2025 – Apr 2026

- Designed and launched advanterra.in for a Bengaluru construction firm; delivered the full site in 3 weeks from initial brief to deployment.
- Built dhanvithfincare.com for a financial advisory LLP; delivered the full site in 2 weeks from initial brief to deployment in vercel in custom domain
- Applied AI-assisted development tools to reduce iteration time, maintain clean codebases, and meet tight client dead lines across both projects.

PROJECTS

MedImputeX — Medical Time-Series Data Imputation | Aug 2025 – Apr 2026

github.com/anweshkumarsv/MedImpute-X | Stack: Python, PyTorch, TensorFlow, Pandas, NumPy, Scikit-Learn, MIMIC-IV

■ 1st Prize — Best Capstone Project of Social Relevance, DSCE 2026 (selected from entire 8th-semester cohort)

- Solved the missing-data problem in real ICU patient records using MIMIC-IV (PhysioNet) — a dataset with 40,000+ patient time-series sequences.
- Trained 3 models independently: BRITS (Bidirectional RNN), SAITS (Self-Attention), and GAIN (GAN-based); each evaluated on MAE and RMSE.
- Built a Fusion Network with learned combination weights; outperformed every single-model baseline — MAE improved by ~12%, RMSE by ~9%.
- Better imputation directly reduces bias in downstream clinical ML predictions, making this work applicable to real hospital decision systems.

Customer-Shopping-Behavior-Analysis | Jan 2026 – Apr 2026

github.com/anweshkumarsv/customer_behavior_analysis | Stack: Python, Pandas, PostgreSQL, SQL, Power BI

- Cleaned and standardized transaction data for 1,000+ customers — removed duplicates and resolved inconsistencies across 15 columns.
- Wrote 10 PostgreSQL queries covering monthly revenue, top-selling SKUs, loyalty tier distribution, and 6-month retention rates.
- Delivered 6 interactive Power BI dashboard views (subscription status, shipping modes, spend by category, regional heatmaps) for strategy decisions.

Real Estate Price Prediction | Sep 2023 – Feb 2024 github.com/anweshkumarsv/BHK1 | Stack: Python, Pandas, Scikit-Learn, Flask, HTML/CSS/JS

- Trained a Linear Regression model on a 13,200-row Bengaluru housing dataset; achieved $R^2=0.86$ after outlier removal and feature selection.
- Reduced raw features from columns using dimensionality reduction.
- Deployed as a Flask REST API with a live HTML/CSS/JS frontend — users get a price estimate in under 1 second based on area, BHK, bathrooms, and location.

EDUCATION

B.E. Computer Science & Engineering | Dayananda Sagar College of Engineering, Bengaluru | 2022 – 2026

CGPA: 9.0 / 10.0 | Top 5% of graduating batch | Specialization: Machine Learning & Data Science

Pre-University (PCMB) | Expert PU College, Mangalore | 2020 – 2022 | **94%**

High School (SSLC) | Sri Ramakrishna Vivekananda Residential School, Sagar | 2020 | **96%**

CERTIFICATIONS

- Data Analytics Certification — Visvesvaraya Technological University (May 2026)
- Python Essentials and Libraries for Data Science — Visvesvaraya Technological University (May 2026)
- Complete Data Science, ML, Deep Learning & NLP Bootcamp (120+ hours) — Udemy (Aug 2025)

ACHIEVEMENTS

- 1st Prize — Best Social-Relevance Capstone Project, DSCE 2026: MedImputeX selected from the entire 8th-semester cohort.
- 9.0 CGPA over 7 semesters of B.E. CSE — consistently placed in the top 5% of the department.
- 96% in SSLC (2020) and 94% in PUC (2022) — strong academic record across all three levels of education.
- 120+ hours of self-directed ML/DL training completed via Udemy, covering supervised learning, deep learning, and NLP.
